

ACTi and Ortega Enable Police Department Video Surveillance Throughout California

ACTi, a leading video equipment manufacturer, and Ortega InfoSystems Inc., a leading provider of video management software (VMS), have empowered many video surveillance systems at police departments throughout California, USA. Together ACTi and Ortega InfoSystems provide high quality comprehensive video security hardware and software solutions.

ACTi provides a full line of MPEG-4 ASP compliant IP cameras, video encoders, decoders, and transcoders. Ortega's flagship software, VideoSmart, is a Video Management System (VMS) that provides comprehensive centralized managements of disparate video subsystems (analog/IP cameras, encoders/decoders/, DVRs, matrix switches, etc.) through intuitive web-based interface. VideoSmart has been designed to fully integrate with all ACTi equipment, and together, they offer one of the most comprehensive IP video security solutions in the market.

Many police departments throughout California want a video security solution that leverages existing technology to enhance the situational awareness and to provide critical information directly to the security officers including access to premise video cameras, floor plans, access/exit points, contact lists, and pre-planned staging/command areas. They especially want a solution that provides relevant information upon an alarm incident such as intrusion, fire, or any pre-configured alarm. The combined ACTi and Ortega solution can deliver these requirements and more.

At Woodlake Police Department, the video surveillance solution manages video security at the headquarters and a nearby work yard. ACTi provides MPEG-4 IP video cameras (CAM-5101, CAM-7100, and CAM-7101) while Ortega provides the VideoSmart Video Management Software (VMS). This surveillance installation takes advantage of power over Ethernet to minimize cabling installations and includes a wireless segment, making it an advance modern surveillance system.

Representation of Woodlake Police Department Surveillance System

Exeter Police Department uses its video surveillance system to manage video security at the police headquarters along with the city hall and a nearby water tower. ACTi provides MPEG-4 IP cameras (CAM-5120, CAM-5200, and CAM-7100) while Ortega provides the VideoSmart VMS to provide centralized management on a web-based intuitive interface.

At another police department, ACTi and Ortega products work together to provide a video surveillance system that manages both existing analog cameras with the new ACTi MPEG-4 IP cameras. Based on ACTi PCI-4100 the VideoSmart VMS manages these IP cameras along with 11 existing analog cameras seamlessly through one centralized intuitive interface. This system also replaced an old matrix switch and a set of old analog monitors with modern plasma displays that can show crisp clear video from all the cameras.

About ACTi

ACTi is the leading product developer and manufacturer of MPEG-4 IP surveillance product solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers the most complete IP CCTV product line and provides one-stop-shopping convenience for IP surveillance solutions including but not limited to MPEG-4 IP camera, video server, transcoder, and NVR. ACTi also offers application software and SDKs. ACTi is the best choice and most reliable partner in the IP surveillance market. For more information, please go to www.acti.com

About Ortega InfoSystems

Ortega InfoSystems Inc. is a leading provider of web-based video surveillance and facility management solutions. Its flagship product, VideoSmart, is a video management system (VMS) that integrates disparate video subsystems such as analog/IP cameras, digital video recorders (DVRs), video encoders/decoders, matrix switches, etc. from many leading manufacturers. It provides centralized management through an intuitive web-based interface. Its superset, FacilitySmart, integrates facility management subsystems such as access control, intrusion detection, fire, building automation, etc. along with the video subsystem. Ortega's software provides critical and timely information to security operators at more than 1000 installations worldwide. www.ortegainfo.com
